

Leader of RISC-V Ecosystem

About StarFive

StarFive was founded in 2018. It is the leader of RISC-V technology and ecosystem development in China, with complete and silicon-proven portfolio of RISC-V CPU IP series and platform-based software and hardware full stack chip solution. StarFive products are widely used in smart home appliances, smart monitoring, industrial robots, traffic management, intelligent logistics, wearable devices, solid-state storage, network communications and edge computing, etc.

Board

Starlight

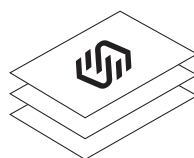

The first affordable RISC-V computer designed to run Linux

Platform

JH7100

The world's first AI vision and image processing platform based on RISC-V

CPU IP

Dubhe Series

The world's first high-performance RISC-V CPU IP built with most instruction extensions
